THE NEW AGE FIBER

TENCEL®

THE NEW AGE FIBER

Botanic bags

Bags of benefits with TENCEL®

TENCEL® can be used for all kinds of bags both as textile and Non woven fiber in upper fabrics and inner linings.

Sustainable

TENCEL® is THE botanic alternative to plastic bags and thus helps to avoid thousands of tons of plastic waste.

Biodegradable

TENCEL® comes from nature and returns to nature.

Compostable

TENCEL® can be disposed of with a good conscience together with the other biological wastes.

Multiple use

TENCEL®, the lyocell fiber from Lenzing, is strong and durable and makes bags reusable again and again and again ...

Remarkable

TENCEL® is a certified fiber.

Compostable / DIN CERTCO, European Ecolabel, FSC, PEFC, OEKO-TEX® STANDARD 100, Vincotte OK compost, Vincotte OK compost HOME, Vincotte OK biodegradable SOIL

Notes on the climate*

- estimated global consumption of plastic bags per year = 1 billion pieces
- 90% of all used plastic bags end up in landfills
- plastic bags need 100 – 500 years to decompose

*Notes on the climate: plastic bags are no longer acceptable: Budianto, Flora / Lippelt, Jana, Ifo Institute Center for Economic Studies (CES), Munich, 2010
